

# THE KIDNEY

## Foreword

### Foreword

This booklet has been written as a guide to provide General Practitioners with a tool to educate patients about the kidney and kidney diseases. The medical illustrations shown throughout the book are basic yet detailed enough to cater to patients' varying needs.

A CD ROM inside the front cover means each section in the book can be printed for your patient to take home and read after the consultation to clarify any concerns.

A list of relevant websites is also provided for any further information you may require.

My colleagues and I trust this will be of some value to you and we would like to thank Servier for producing this book.

Yours sincerely,

**Lloyd Ibels MD(Syd) MBBS FRACP**

**Head of Department of Renal Medicine**

Royal North Shore Hospital

St Leonards NSW 2065

**Clinical Professor of Medicine**

**University of Sydney**
